DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-14, are rejected under 35 U.S.C. 103(a) as being unpatentable over Goldstein (US 2002/0069078) in view of Shi et al. (US 2004/0203674).

Regarding claims 1, 11, Goldstein discloses a system and method for creating custom wallpaper, comprising displaying a wallpaper on the display, changing properties of a wallpaper on the display (see fig.1, element 106b, paragraph [0006]. [0059] and its description), except for in response to the remaining amount of prepaid telecommunication costs. However, Goldstein further discloses central server may accept payment for the custom wallpaper from the user by way of any well-known electronic funds transfer mechanism (see fig.1, element 104, paragraph [0040] and its description). Shi discloses a multi-call display management for wireless communication devices comprises money left for pre-paid phone calls (see fig.1, paragraph [0043]). Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use Goldstein's invention in order to provide the customer the choice of creating custom wallpaper depend on money left.

Regarding claims 2-8, 12- and 14, Shi further discloses amount of telecommunication costs spent and hiding a portion proportional to the amount of

remaining telecommunication costs spent (see fig.1, paragraph [0032], paragraph [0043]).

Regarding claims 9-10, and 13, the Examiner takes Official notice that these features have been use in telecommunication devices is notoriously well known in the art.
